SUMMARY

DevOps Engineer with a Bachelor's degree in Information Systems and strong skills in DevOps, cloud computing AWS, Linux server administration, infrastructure automation, and network engineering. Skilled in improving CI/CD pipelines, managing scalable systems, and ensuring secure and reliable environments. Comfortable working between development and operations teams to build efficient and stable systems.

WORK EXPERIENCE

Cloud Support Engineer - PT Berca Hardayaperkasa   **2025 - Present**

- Create, deploy, and manage AWS cloud systems while guaranteeing performance, security, and scalability.
- Work together with cross-functional teams to establish cloud-based solutions and specify infrastructure requirements.
- Construct and implement cloud-based services and apps from the bottom up.
- Investigate and fix infrastructure problems while putting preventative measures in place.
- Ensure client compliance with security best practices and industry standards.
- Up-to-date with AWS services and industry trends, making recommendations for improvements.

DevOps Engineer - PT Tata Sarana Mandiri   **2024 - 2025**

- Monitor, manage, and optimize infrastructure expenses.
- Deploying an Application Programming Interface (API) using Docker and AWS Amplify.
- Set up a CI/CD pipeline using GitLab and Jenkins.
- Setting up a domain and SSL certificate for Application Programming Interface (API)
- Implement Kubernetes for service API
- Create dashboard monitoring logs using Grafana Loki
- Maintain 24/7 uptime for products

IT Drafter - PT Telkom Akses   **2019 - 2023**

- Integrating the results of HLD-APD-ABD development into the Telkom Group system.
- Designing HLD & APD.
- Monitoring and Resolving broken connectivity tickets.
- Manage files related to the development of Telkom Group
- Monitor the development of Telkom Group
- Prepare a recap of Telkom Group development data

IT Helpdesk - PT Telkom Akses   2016 - 2018

- Integrating the results of HLD-APD-ABD development into the Telkom Group system.
- Designing HLD & APD.
- Monitoring and Resolving broken connectivity tickets.
- Manage files related to the development of Telkom Group
- Monitor the development of Telkom Group
- Prepare a recap of Telkom Group development data

EDUCATION

DumbWays Indonesia Teknologi   2023

- Developed and maintained robust CI/CD pipelines, enabling frequent and reliable software releases
- Implemented infrastructure as code (IaC) using tools like Terraform and Ansible, resulting in efficient and scalable deployments
- Designed and managed containerized environments using Docker and Kubernetes
- Optimizing resource utilization and ensuring high availability
- Collaborated closely with cross-functional teams, including developers and operations
- Monitoring and logging practices, utilizing tools like Prometheus and Grafana, to proactively identify and resolve issues

Binaniaga Indonesia University   2017 - 2021

- Bachelor Degree in Information Systems, 3.08/4.00

ADDITIONAL INFORMATION

- **Technical Skills:** DevOps, Cloud Computing, Linux Server Administration, Network Engineer, Infrastructure
- **Languages:** English (passive)
- **Certifications:** Belajar Membangun Arsitektur Microservices, Belajar Dasar Git dengan GitHub, Menjadi Linux System Administrator, Belajar Implementasi CI/CD, Architecting on AWS (Membangun Arsitektur Cloud di AWS), Belajar Dasar Cloud dan Gen AI di AWS, Belajar Jaringan Komputer untuk Pemula, Belajar Dasar-Dasar DevOps (Dicoding Indonesia)
